**To Whomsoever It May Concern**

I have known Dr. Zubin M. Vaid for the last five years. He joined as a resident in the Medicine department and passed his M.D. Medicine in the first attempt. After that he has worked with us in the department of Medicine as a lecturer for over a year. As a post graduate student he was hard working, sincere and efficient. He is extremely well versed in handling crowded OPDs, emergency medical care, mass poisonings, epidemics etc. He has been exposed to specialities such as cardiology, neurology, respiratory medicine, nephrology, haematology, gastroenterology, rheumatology and critical care medicine. His performance in all these areas has remained excellent.

He has always volunteered for academic as well as administrative responsibilities. He was the chief investigator for the clinical research project "Steroids in Tuberculous Meningitis." As a lecturer he was involved in undergraduate and post graduate teaching such as bedside clinics, lectures, seminars, etc. He actively participated in HIV clinics and presented papers in both national and international conferences. He was in charge in clinical photography and took pains to reach patients in different wards to compile a teaching album for the medical students.

Sincerity, commitment and concern for work, a good clinical acumen, and a research-oriented mind are the strengths of Dr. Zubin Vaid. He has a loving nature and a smiling face. He bears good moral character.

He will be an asset to the set-ups where he offers his excellence as a consultant. I wish him all the best for his future career.

  
Dr. L.S. Bichile
